

TEAMZ

Powered by Tauratech Software Systems

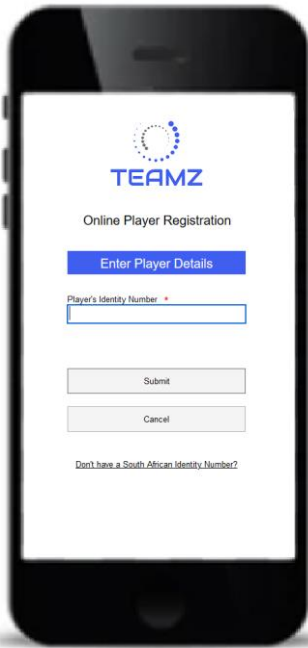

Simplifying the administration of your players and teams

Discover TEAMZ, the online solution to managing your players and teams on a secure, cloud-based platform. Easy to understand and user friendly. Developed locally using the expertise acquired by more than 30 years of software development experience.

Sports Administration Software

Update

Easy to use and maintain player information with the TEAMZ online player and administration portals

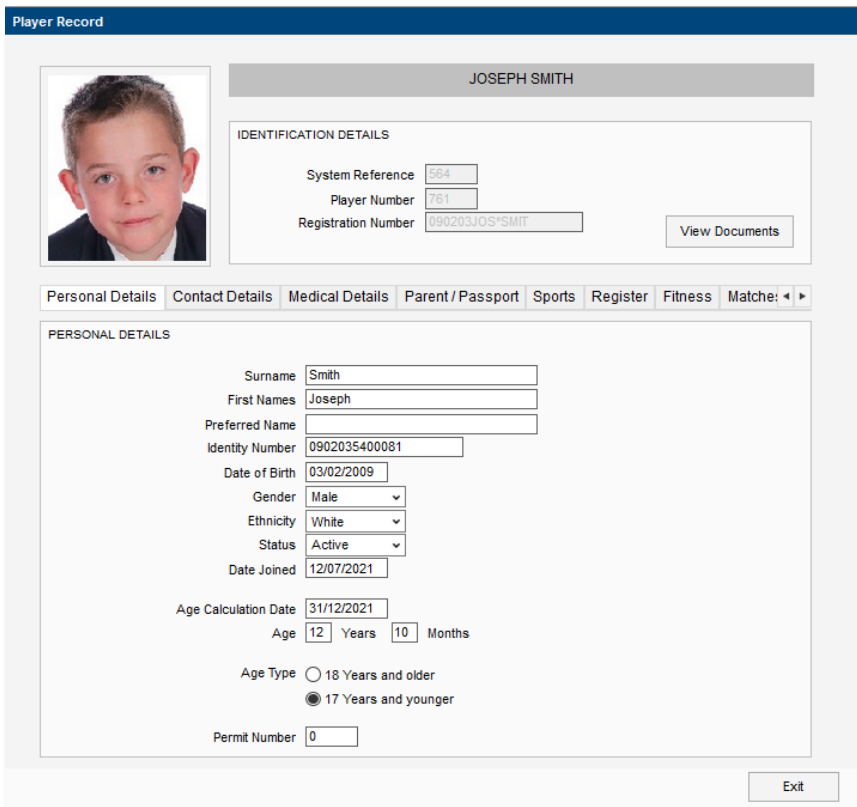

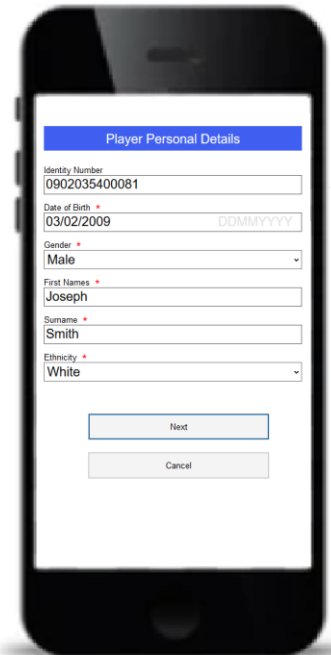

Online Player Registrations

The mobile friendly and customisable player registration portal allows players to register for a particular sport and season.

Players are identified using their Identity Number, or Passport Number if no identity number is available.

Players may update their personal details using the online portal, thereby reducing your administration workload.

One Player Record

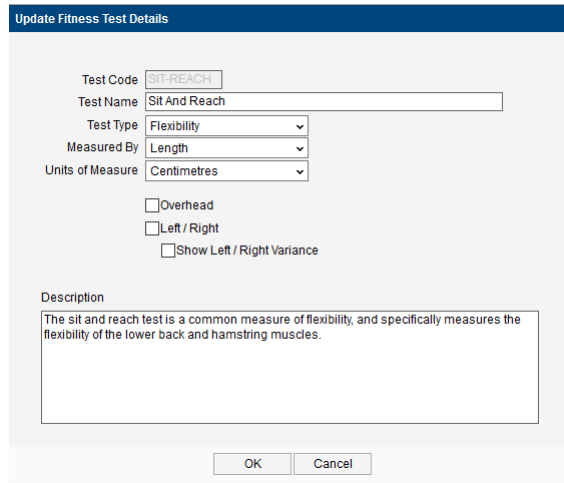

A single player record is created for the entire lifespan of the player on the TEAMZ database, and a complete history of all activity is retained.

So, if a player moves from one club or school to another, TEAMZ is able to track the player's progress through his or her sporting career.

Player documents (e.g., Birth certificate, medical aid card) may be attached to the player record using the integrated document management system.

Set Up

TEAMZ has built-in defaults and the ability for you to create your own unique parameters for your organisation

Update Fitness Test Details

Test Code: SIT-REACH
Test Name: Sit And Reach
Test Type: Flexibility
Measured By: Length
Units of Measure: Centimetres

Overhead
 Left / Right
 Show Left / Right Variance

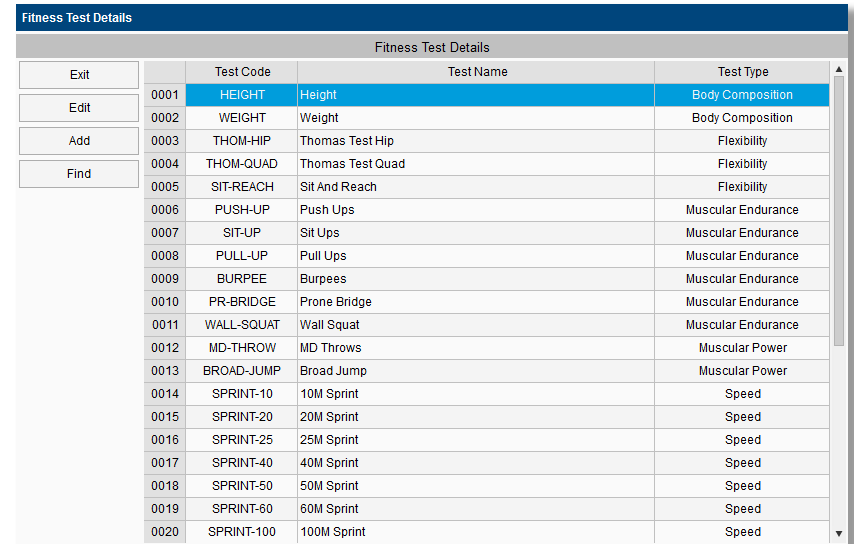

Description
The sit and reach test is a common measure of flexibility, and specifically measures the flexibility of the lower back and hamstring muscles.

OK Cancel

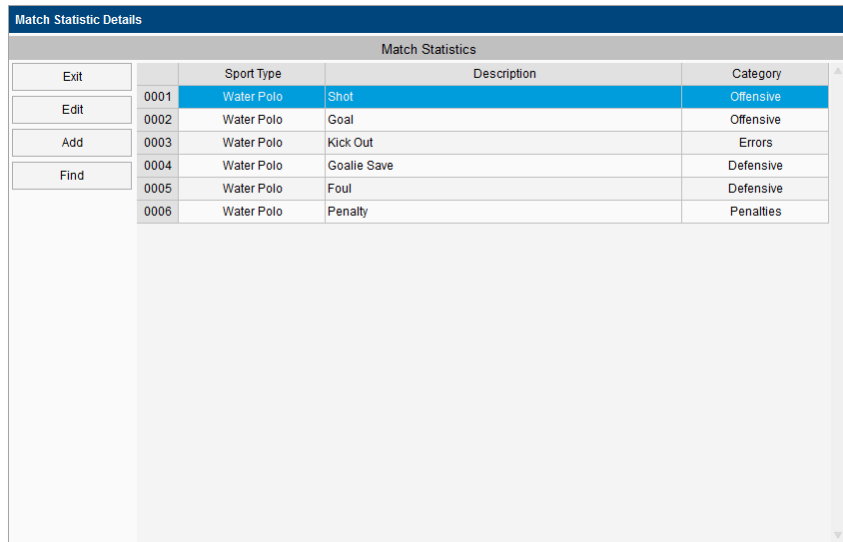

Fitness Testing

Unlimited fitness tests can be added to suit your unique environment. Flexible parameters allow the tests to be refined to your own requirements.

Up to 40 of these defined fitness tests can be attached to each sport type created within TEAMZ.

Multiple Sporting Disciplines

Multiple sports may be managed within TEAMZ, e.g., Water Polo, Rugby, Hockey, Soccer, Basketball, Netball etc., each with their own set of unique parameters.

The teams and players are managed using the definable sporting seasons and the participating players are automatically expired from the sport at the end of the season. The participating player groups may be selected independently for each sport within TEAMZ.

Match statistics to be tracked for each sport can be selected from the main Match Statistic definitions.

Multiple fitness tests can be selected for each sport which are recorded for each participating player.

Customised Player Groups

Up to 20 different Player Groups may be defined within your organization to enable players to be grouped together by age, gender or any other criteria.

Team selections are created by including the players belonging to the defined player group.

Create A Match

Upcoming matches may be scheduled in advance for the various competitive teams that have been created within TEAMZ.

The selected statistics for the particular sport will be loaded into the match update.

Play Matches

Each statistic that has been loaded can be updated for each participating player as the match is in progress. A complete log of the game as it happened is recorded for the match.

The player record is updated with the applicable statistics at the end of the match once it has been finalised.

Manage Fees

Various types of player fees can be managed within TEAMZ and attached to the player's record. The status of a player may be set to pending until the outstanding fees have been paid.

Only active players will appear in the training registers and team selections.

Development of a payment gateway is currently in progress to allow payments to be made during the registration process.
